

Admin Walkthrough Guide

Partner Portal — how to run day-to-day admin tasks

A practical guide for approving Partners, managing the catalog, fulfilling inventory package orders, and reading reports.
Written for non-technical use.

Document: Admin Walkthrough Guide

Portal: Purely Eve Distributor / Partner Portal

Version: 1.0 · Milestone 4 handover

Date: September 2026

- 06 Inventory package orders (fulfillment)
- 07 Reports (the seven admin reports)
- 08 Company Stripe view
- 09 Go-live checklist (test → live)
- 10 Quick reference

HOW TO USE THIS GUIDE

Follow the numbered steps in each section. Gold callouts are tips. Brown callouts flag important business rules. Menu paths look like this: **Admin** → **Reports** → **Tax**.

1. Signing in & the admin menu

Open your portal URL and sign in with the admin account credentials provided at handover. After login you land on the **Admin overview**.

TOP NAVIGATION

[Overview](#) [Distributors](#) [Products](#) [Inventory orders](#) [Reports](#)

Use **Sign out** in the header when you are finished.

TIP

Bookmark the admin URL. Partners use a separate Partner login area and cannot see admin screens.

2. Overview dashboard

The overview gives a quick pulse of work waiting for you:

Pending applications

New Partner registrations waiting for approve / decline.

Documents to review

Resale certificates (and related uploads) awaiting accept / reject.

Orders awaiting fulfillment

Paid inventory package orders that still need a shipping label.

Recent applications

Latest submissions — click a business name to open the Partner file.

3. Approving Partners & resale documents

Partners register in the portal (after coming through your Shopify application flow). They accept the Partner Agreement and upload a resale certificate during signup. You still review and activate them here.

Approve a registration

- 1 Go to **Distributors**.
- 2 Open the Partner with status **Pending**.
- 3 Review contact details, business info, and agreement acceptance.
- 4 Choose **Approve** (or Decline with a note if needed).

Accept the resale certificate (required before packages)

- 1 On the same Partner page, open the uploaded resale document (view / download).
- 2 If it looks correct, mark it **Accepted**.
- 3 If it is wrong or incomplete, reject it so the Partner can re-upload.

BUSINESS RULE

A Partner cannot purchase inventory packages until (1) their registration is approved and (2) their resale certificate is accepted. Inventory package orders are prepaid before you ship.

Suspend or remove

On an approved Partner you can **Suspend** or **Remove** access. Deleting a Partner is permanent — only use when you are sure.

4. Products & inventory packages

Under **Products** you manage two catalogs: consumer products Partners sell to customers, and inventory packages Partners buy from the company.

Consumer products

Name, description, image, weight, and three prices you set: retail, wholesale, and introductory. Partners cannot edit price.

Inventory packages

Starter (20 units), Growth (40 units), plus any future packages you add. Price, unit count, weight/dims, image, and active flag.

Add or edit a consumer product

- 1 Go to **Products** → **Add product** (or open an existing one).
- 2 Enter SKU, name, description, image, weight, and the three prices.
- 3 Save. The product is available for Partner invoices according to visibility rules below.

Add or edit an inventory package

- 1 On Products, use the inventory packages section → add or edit.
- 2 Set name, SKU, unit count (how many serums the package credits), price, shipping weight/dims, image.
- 3 Leave **Active** on when Partners should be able to buy it.

TIP — \$1 TEST PACKAGE

For Stripe practice, use a low-price test package. Deactivate or hide it before real Partner purchases so nobody buys the test SKU by mistake.

5. Who can see which products (assignments)

Each product and package can be **visible to all Partners**, or limited to selected Partners.

- 1 Open the product or package detail page.
- 2 If “visible to all” is checked, every approved Partner can see it.
- 3 If you uncheck it, the list starts empty — nobody is assigned yet.
- 4 Search Partners (alphabetical list) and assign only who should see that SKU or package.

WHEN TO USE LIMITED VISIBILITY

Use this for intro-only offers, regional pilots, or special packages that should not appear in every Partner’s catalog.

6. Inventory package orders (fulfillment)

When a Partner pays for a Starter / Growth (or other) package, the order appears under **Inventory orders**. You ship from the company side; labels are purchased on the company EasyPost account.

- 1 Go to **Inventory orders**.
- 2 Filter by status (e.g. Paid), date, or Partner name / order number.
- 3 Open a paid order and buy / print the shipping label.
- 4 Mark fulfilled when shipped. Stock is credited to the Partner when payment completes.

SHIPPING MODEL (LOCKED)

Company pays EasyPost for inventory-package labels to Partners. For Partner → customer orders, Partners collect shipping on the invoice; that shipping amount comes to the company (application fee) and the company buys the customer label.

7. Reports (the seven admin reports)

Open **Reports** from the top menu. Each report supports filters; new packages appear automatically.

#	REPORT	WHAT YOU GET
1	Partner inventory package sales	Per Partner: date ordered, amount, volume. Flags Partners with no package order in 90+ days. Filter by name and dates.
2	Company-wide package volume	Month, YTD, lifetime units/volume. Filter by Partner, dates, and package (e.g. 20 vs 40 units).
3	Partner customer orders	Retail vs wholesale per Partner; month / YTD / lifetime. Click an invoice for customer + line items.
4	Company-wide customer volume	All Partner customer sales (excludes inventory packages). Filter retail / wholesale / dates.
5	Tax collected	Tax by Partner and ship-to state for month, YTD, or custom range.
6	Shipping collected	Customer shipping collected for the company, with fulfilled vs pending label status.
7	Company Stripe	Platform balance, shipping fees, package sales on the company account, recent payouts.

PARTNER REPORTS

Partners also have a **Reports** page for their own sales, tax, and CSV download. They never see network-wide admin totals.

8. Company Stripe view

Path: **Admin** → **Reports** → **Company Stripe**.

- **Available / Pending** — platform Stripe balance.
- **Shipping collected** — amounts taken from Partner checkouts for postage.
- **Inventory packages** — paid package volume on the company account for the selected period.
- **Balance transactions & payouts** — recent activity (full ledger also lives in the Stripe Dashboard).

REMINDER

Customer card payments land on each Partner's connected Stripe account. The company receives shipping application fees and inventory-package payments. Card processing fees on customer sales are absorbed by the Partner.

9. Go-live checklist (test → live)

- 1 Complete a full dry run in Stripe **test** mode with the \$1 test package (pay, label, stock credit).
- 2 Confirm Stripe Tax registrations for states you sell into (Test first, then Live).
- 3 Confirm EasyPost company key and label buying work on a paid package order.
- 4 Switch portal env keys to Stripe **live** only when ready for real money.
- 5 Deactivate the \$1 test package before Partners place real Starter / Growth orders.
- 6 Have one trusted Partner place a small live package order and verify payout + fulfillment.

DO NOT SKIP

Never mix test and live keys. After switching to live, run one controlled real purchase before inviting the full Partner group.

10. Quick reference

TASK	WHERE
Approve / decline Partner	Distributors → open Partner
Accept resale certificate	Distributors → documents on Partner page
Add consumer SKU	Products → Add product
Add / edit package (20, 40, future)	Products → inventory packages
Limit who sees a SKU/package	Product or package detail → assignments
Ship a package order	Inventory orders
Sales / tax / shipping reports	Reports
Company balance & fees	Reports → Company Stripe

PRICING REMINDER (SET BY ADMIN ONLY)

Retail (DTC) · Wholesale (business/spa) · Introductory (30-day Partner promo). Partners choose customer type on the invoice; prices fill in read-only.
